Summary

AI draft by Notice Analyst · cites the RFP and Amendment 2

CBP is buying engineering and integration support for its zero trust roadmap: identity and access management, network micro-segmentation, and continuous monitoring across mission systems. The work is a single-award task order with a base year and four option years.

Key requirements

- Key personnel: program manager, zero trust architect, ICAM lead
- Work aligned to the agency zero trust strategy and federal ZTA guidance
- Facility clearance required at award

Evaluation factors

- Technical approach, then management approach and key personnel
- Past performance on similar-scope federal work
- Price; best value tradeoff

Watch-outs

- Amendment 2 moved the due date and added a Q&A file
- Oral presentation required for the competitive range

Ask the documents: e.g. What clearances do key personnel need? Ask

Key details

NAICS	541512
PSC	DA01
Set-aside	Small business
Estimated value	[VALUE]
Response due	[DATE], 2:00 PM ET
Place of performance	Washington, DC
Contract type	Task order, FFP + T&M
Vehicle	[VEHICLE]

Why it scores 86

NAICS in company profile	30 / 30
Target agency	20 / 20
Set-aside we qualify for	15 / 15
Keyword match	14 / 20
Value in our range	7 / 15

Version history

- **Amendment 2** · yesterday
  Response due date moved later; Q&A document added.
- **Amendment 1** · 9 days ago
  Section L page limits clarified.
- **Original** · 3 weeks ago
  Solicitation posted with 5 attachments.
